The Notifications tab within InteleConnect lists all new and recent notifications for patients referred by the user.

## Login to InteleConnect via: https://gchhspacs.health.qld.gov.au/

- Notifications can be set to announce the availability of final reports, preliminary reports, images, critical results, and other information
- The default setting is to have only *Final* reports and *Critical Result Notifications* show. Users can adjust their personal notification preferences to enable other features
- You can view up to 10 notifications at a time, up to a maximum of 100 notifications. To view the next 10 notifications, click the *Show More* link

Choose this Option:	To View:
All Notifications	All new and recent information about the patients who were sent to you from your radiology provider. Notifications announce the availability of final reports, preliminary reports, images, critical results, and other information.
My Notifications	Only your preferred notifications, that is, the notifications you selected in your Profile.
Critical Notifications	Urgent or important information that requires your immediate attention and acknowledgement. The number in parentheses indicates the number of pending critical results (critical results that are incomplete). To complete a critical result, your radiology provider will contact you to acknowledge it. Optionally, your radiology provider will allow you to complete the critical result by acknowledging it yourself.
Pending Critical Notifications	Only pending critical results, i.e. critical results that are incomplete or have not been acknowledged.
