ICAROS – Injectable Cabotegravir and Rilpivirine (Cabenuva) – Observational study

This study aims to gather information about people who are either on this medication or assisting in the administration of it

Participation is voluntary and will not affect any ongoing care.

There is more information if you use the QR code or log in to the web address.

Email addresses are collected for follow up and for emailing the gift vouchers, but this will be stored securely only within the REDCAP data collection system and not within the study data.
