

Transition to Specialty Program

Gold Coast Health offers a Transition to Specialty Framework which provides nurses with opportunities to upskill in a specialty area.

Transition to Specialty requires commitment to undertake formal education covering the theoretical knowledge and skills required to practice in that specialty area. The program is supported by the relevant specialty education team. Once completed, this will attract advanced standing at tertiary level to enable participants to work towards a post graduate qualification.

Transition to Specialty is offered as a 12-month temporary contract within the specialty area.

The following specialty areas are looking for applications from all interested and committed Gold Coast Health staff:

- Cancer and blood Disorders Ambulatory Care
- Renal Services (Pre-requisites required)
- Emergency Department
- Adult Intensive Care
- Perioperative Services

These services are looking for Graduates/Novices who are or have already undertaken the newly qualified nurse transition and want to develop further in:

- Mental Health Services
- Children's Critical Care
- Paediatric Services
- Special Care Nursery/Neonatal Care Unit

More information including how to apply for the Transition to Specialty will be available on the Gold Coast Health intranet.
