

IMMUNOLOGY

C1 West | Gold Coast University Hospital

immunology

This 16 bed unit aims to provide efficient and safe patient focused care to immunology, rheumatology, oncology, and specialist palliative patients in collaboration with a dynamic multidisciplinary team. Immunology provides high standard nursing care to all patients and their families.

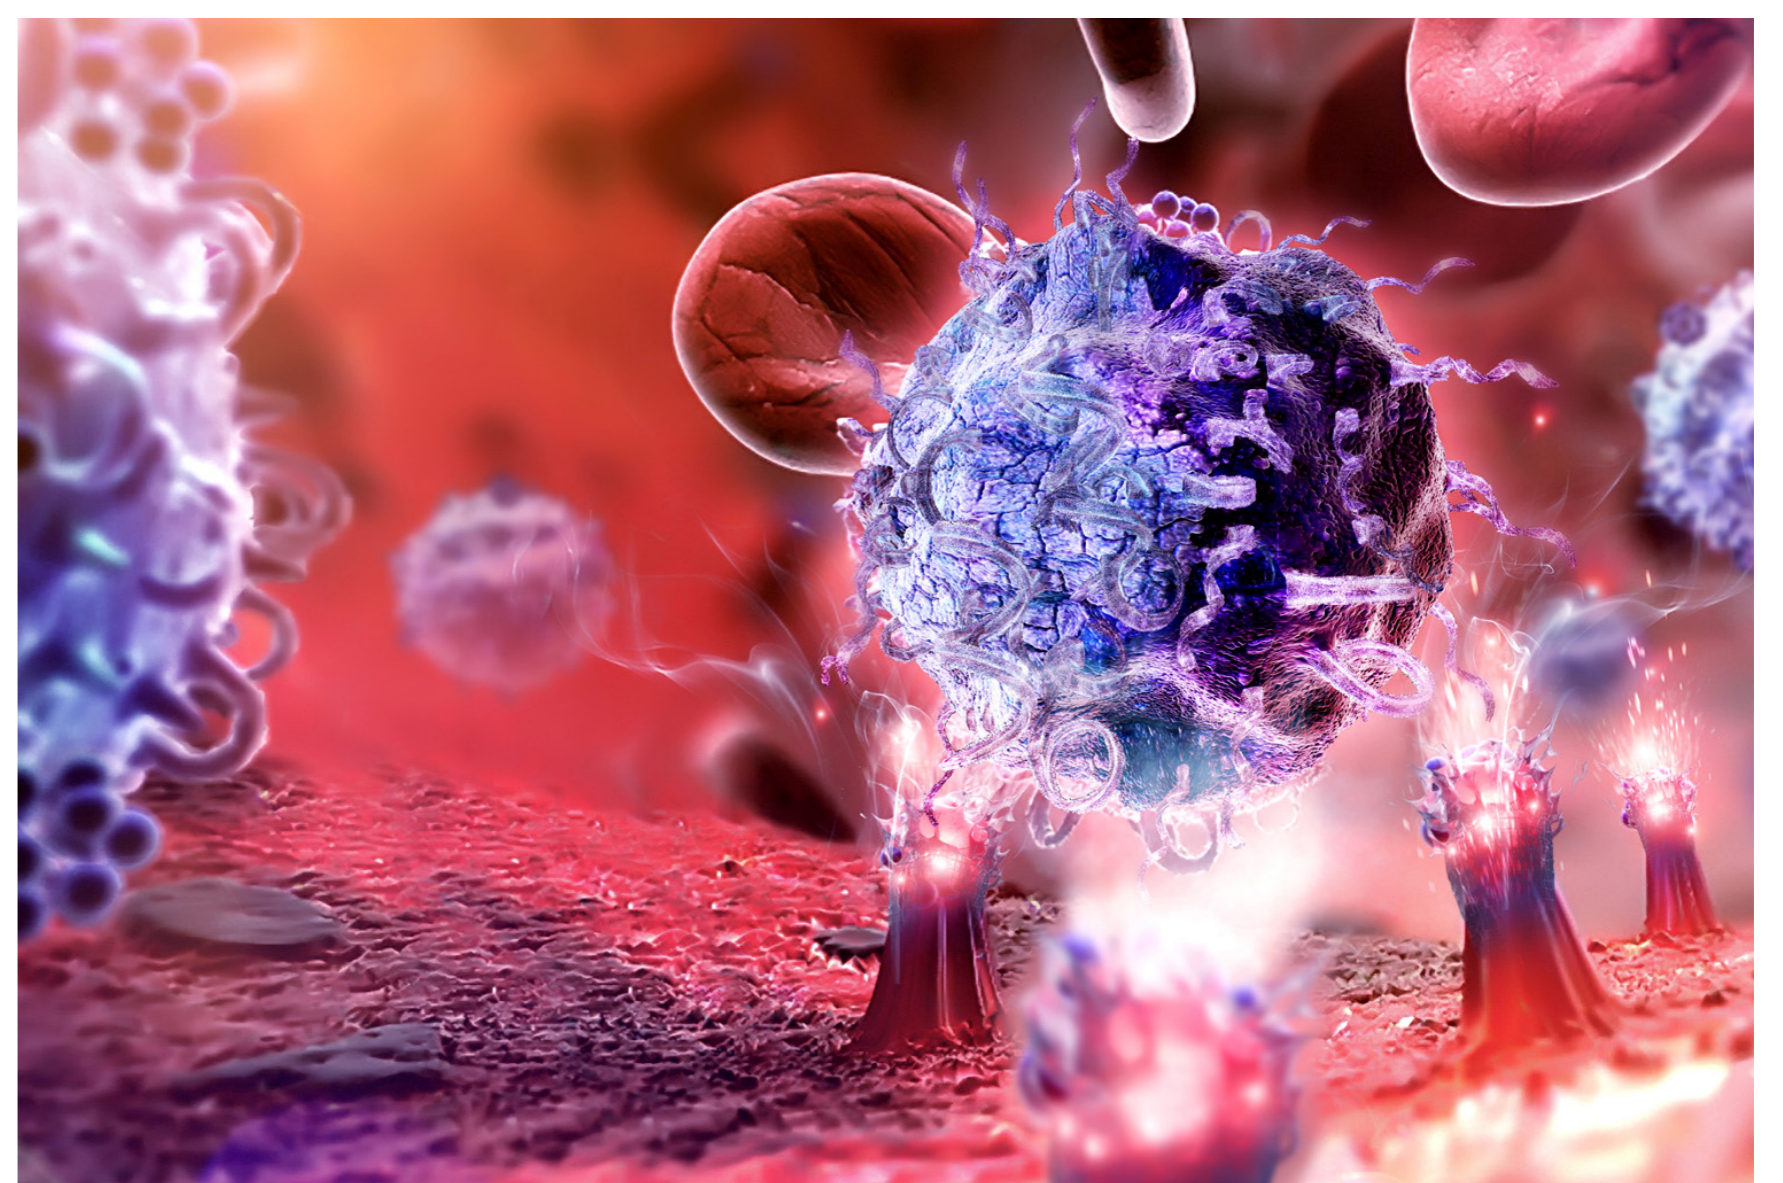

The function of the immunology unit is to provide quality patient focused care for patients who have been diagnosed with an infection requiring isolation: MRSA, RRSA, VRE, MRAB, ESBL, C. Diff and respiratory airborne infections.
