

NEUROLOGY

C5 West | Gold Coast University Hospital

neurology

The neurology unit is a 24 bed ward with four additional rehab beds. The ward is a diverse unit with many professional development opportunities.

Dealing with complex patients and their neurological conditions in an acute setting, develops and strengthens your nursing skills. We continually grow and expand our expertise being the leading stroke unit of south east Queensland. We provide expert care for patients with conditions such as stroke, transient ischaemic attack, parkinson's disease, multiple sclerosis, motor neurone disease, seizures and many more neurological conditions.
