

RENAL

C3 West | Gold Coast Hospital

renal

Renal services provides tertiary level renal patient care of the clients with acute and chronic renal conditions providing pre-dialysis care, education and community support.

We manage surgical clients who have pre-existing renal conditions and we also provide high quality, patient focused care to those with end stage renal disease, requiring haemo and/or peritoneal renal replacement therapy. We also provide acute dialysis to inpatients and emergency presentations as required.
