

Neurology

C5 West | Gold Coast University Hospital

neurology

This diverse 28 acute bed unit offers many professional development opportunities including managing acute stroke patients receiving mechanical thrombectomy (clot retrieval) and thrombolysis treatments; as well as patients with central nervous system disorders, movement dysfunction such as Parkinson's Disease and Complex Epilepsy. Working in this unit will allow you to hone your nursing skills through thorough assessments and holistic patient care. We pride ourselves on being the leading stroke unit for South-East Queensland and for being a resource unit throughout the health district for Neurological care.
