

Outpatients

GCUH and Robina Hospital

outpatients

The Adult Outpatient Department (AOPD) provides a broad based ambulatory care service which provides care planning, minor procedures and management to outpatients referred by general practitioners for specialist opinion and management, or as a post-operative follow up and follow up post discharge from hospital. The Adult Outpatient Department is a dynamic area to work in but is vastly different from working in the wards. AOPD currently sees over 1200 patients per day across over 25 specialities at Robina and GCUH. AOPD currently supports graduate registered and enrolled nurses.

Learning Opportunities

- Advanced wound dressing skills including Negative Pressure Wound Therapy (VAC) and Compression Bandaging (Coban)
